Living near a high risk area for flooding and hurricanes as well as driving hundreds of miles weekly to do mobile physicals, I cannot depend on local broadcaster to furnish much needed weather for my territory. It is simply not safe on the road to search local systems while driving at high speeds to ensure my safety. I urge you to reject NAB's petition 04-160 and support XM radio. I have used their services numerous times during the major flooding and heavy rains to avoid serious trouble on the road after trying local stations which ignored the weather alerts until top of the hour. I simply don't have the time to keep searching for accurate weather alerts or traffic situations.

Again please allow us to keep XM radio weather and traffic alerts. I am paying for quality information.
